Personal Statement

I am a passionate and innovative MERN Stack Developer with a strong focus on building web applications that solve real-world problems. I am committed to continuous learning and strive to stay ahead of emerging trends in technology. By leveraging my skills and collaborating with teams, I aim to contribute to impactful projects that foster growth and drive success in the tech industry.

Skills

HTML5, CSS, Bootstrap, Tailwind CSS, JavaScript, React, TypeScript, Node.js, Express.js, Laravel, MongoDB, MySQL, Git, GitHub, JWT, OAuth, RESTful APIs, Webhooks, Stripe, PayPal, Docker, AWS, Heroku

Professional Experience

Cribsandrides - E-Commerce Platform Developer

Developed a responsive platform for luxury cars and houses with real-time updates and secure user authentication.

- Built a dynamic e-commerce platform using React, HTML, CSS, and JavaScript, allowing users to browse, inquire, and interact with the platform seamlessly.
- Integrated third-party APIs to provide real-time product updates.
- Ensured cross-device compatibility with responsive design principles and media queries.

Technologies Used: React, Node.js, Express.js, MongoDB, RESTful APIs. [LINK](#)

Server-Side E-Commerce Platform Developer

Built a server-side solution for an online shopping experience with secure user authentication and payment integration.

- Developed a secure backend with Node.js and Express.js, managing user accounts, products, and transactions.
 - Integrated Stripe API for payment processing and used JWT for secure user sessions. □ Ensured scalability and high performance for handling a growing user base.
-

Fitness Tracking Application Developer

Engineered a server-side-only application for fitness tracking and goal management.

- Designed a secure backend for user authentication and progress tracking.
 - Integrated third-party APIs for workout routines and nutritional insights.
 - Built personalized dashboards to provide users with a tailored fitness experience.
-

Loan Application System Developer

Developed a loan management system with integrated interest calculation and automated notifications.

- Created a comprehensive backend system using Node.js and Express.js to handle loan applications, reviews, and approvals.
 - Implemented JWT-based authentication for secure user access. □ Integrated Nodemailer for automated email notifications.
-

Internships

MERN Stack Developer Intern - Kodex Africa (2023:05 - 2024:01)

- Built engaging user interfaces without sacrificing functionality.
- Applied object-oriented programming to design client-server systems.
- Participated in pair programming sessions and code reviews with team members to ensure optimal code quality.

Technologies Used: React, JavaScript, HTML, CSS, Git, Jest

Previous Experience

Production Technician Supervisor - Cutix Cables Plc (2019:12 - 2021:07)

- Supervised production teams and trained new employees.
 - Conducted quality checks to ensure compliance with company and regulatory standards. □ Enhanced production efficiency through leadership and process improvements.
-

Education

Higher National Diploma in Computer Science

Federal Polytechnic Oko | 2017:09 - 2022:05

Hobbies and Interests

- Traveling Organizing Events Football
